European Social Survey

ESS 2010 Data Protocol

Edition 2.4 September 2010

NSD

NORWEGIAN SOCIAL SCIENCE DATA SERVICES

Introduction

The object of the ESS 2010 Data Protocol is to offer a comprehensive document with specifications and procedures to be used in the production of national ESS data files. The underlying principle is that resources put into the planning phase of an international survey result in national data of higher quality and standardisation, which in turn will advance the release of the integrated (official ESS 2010) data files from the ESS Data web site, http://ess.nsd.uib.no.

In general, the Data Protocol gives specifications for the coding of data, the production and delivery of data files and other electronic deliverables. Some of the specifications, for example coding standards, are found elsewhere on the ESS Archive Intranet web site, http://essdata.nsd.uib.no/.

The Data Protocol defines what the National Teams are required to deposit to the ESS Archive. If the content and quality of the electronic deliverables do not adhere to the specifications in the Data Protocol and the ESS Archive Intranet web site, the archive reserves the right to ask for new deliverables.

Please read all sections of this Data Protocol. The first section A describes how the communication between the archive and the data providers is organised.

Section B, "Electronic deliverables", gives an overview of the files and documents the National Co-ordinators are asked to deliver to the archive. Section B does also describe the more practical issues concerning data delivery, such as common identifiers in the files. Please pay special attention to section B7 "Anonymised data".

Section C of the Data Protocol deals with "principles of variable definitions". This section gives detailed information on the usage of missing values, how multiple responses are dealt with, as well as the rationale behind variable names, labels and categories. Please pay special attention to the coding of "Refusals" in section C1.

The use of international standards is described in section D. To avoid the use of different versions of the same international standards across countries, the National Teams are required to use the standards made available from the ESS Archive Intranet web site.

Country-specific variables and administrative variables are listed, explained and specified in section E, whereas section F contains tables of variable names and definitions for all data files. Section F4 is a flowchart documenting the routings in the ESS Core part of the questionnaire.

Section G refers to programmes for applying labels, categories, and formats in SPSS and SAS. The programmes will be made available from the ESS Archive Intranet web site.

Information about National Technical Summaries (NTS) are found in section H of the Data Protocol.

The National Teams will be informed by e-mail when the Data Protocol and the ESS Archive Intranet web site are updated.

ESS Data Team at NSD
essdata@nsd.uib.no

Content

Updates from previous editions

From Edition 2.3 to 2.4
Change of format
REGIONxx format has been corrected to A5.

E1.4 Region Links to current NUTS nomenclature and statistical regions for the EFTA countries and Candidate countries have been updated.

Change of filter instructions
F7: LVGPTNEA filter instruction has been amended.

From Edition 2.2 to 2.3
Change of filter and routing instructions
F9: ICPART2 routing instruction for code 2 "All others" has been corrected.
F11: MARSTS filter instruction has been amended.
F13: CHLDHHE filter instruction has been corrected.

From Edition 2.0 and 2.1 to 2.2
Change of variable name and label
G33: PORGSR "MY PRESENT POSITION IN MY ORGANISATION IS SECURE" changed to LSINTJB "MOVE TO LESS INTERESTING JOB IN ORGANISATION NEXT 12 MONTHS".
D33: PPLSTDH "PEOPLE WHO BREAK THE LAW SHOULD BE SENTENCED HARDER THAN TODAY" changed to HRSHSNTA "PEOPLE WHO BREAK THE LAW MUCH HARSHER SENTENCES".

Change of category label
I6: TESTD6 category label for code 55 amended.
I15: TESTD15 category label for code 55 amended.
I22: TESTD22 category labels for codes 3, 4 and 5 amended.
I24: TESTD24 category labels for codes 3, 4 and 5 amended.
I25: TESTD25 old category 3 deleted and remaining categories renumbered.

Code added
G41: RPLJBDE code 55 was mistakenly left out for response category "Would not be replaced" in edition 2.1. This has been rectified in current edition.

From Edition 1.0 to 2.0
Change of variable names, country-specific variables on education level (sections E1.1 and E1.3)
F15: EDLVAxx changed to EDLVDxx.
F45: EDLVPAxx changed to EDLVPDxx.
F58: EDLVFAxx changed to EDLVFDxx.
F64: EDLVMAxx changed to EDLVMDxx.

EISCED identified as variable to be constructed by NSD (section D2).

INTAGE changed to INTAGEA (section E.3)

Change of instruction in section E.3 "Start of interview, main questionnaire (sections A-<u>G</u>) and : End of interview, main questionnaire (sections A-<u>G</u>)"
Change of reference to Supplementary questionnaire sections H and I (section E3).

Sections added
Section F Variable definition and flowcharts
Section G Programmes for applying Data Protocol variable names, labels and categories
Section H National technical summary

Main changes from the ESS round 4 Data Protocol

Education, revised measure
In ESS round 5 a new measure on education is introduced. The ESS has changed its previous 7-category target harmonised measure for respondents (EDULVL), which was used in round 4, to a more detailed ISCED coding with up to 25 codes (EDULVLA). In addition there will be a 7-category variable, EISCED, that will be mapped by NSD from the new detailed ISCED measure. The educational measure used in round 4 of the ESS has shown a number of weaknesses, i.e. a low level of cross-national comparability, and was therefore in need of a revision. The new measure contains a more detailed mapping of the educational system. More information on the education measure can be found in section D2.2 and E1.3.

Industry, revised standard
In ESS round 5 a new standard for the post coding of industry, NACE Rev.2, is to be applied. NACE Rev. 2 is a major update of NACE Rev.1.1, which was used in round 4 of the ESS. Correspondence between the two is not possible. More information on NACE Rev.2 can be found in section D1.4.

Region
In ESS round 5 there are new specifications for the region variable, where all countries are asked to provide country-specific regional variables according to the Nomenclature of Territorial Units Statistics (NUTS) level classification. The aim of the new specifications is to accommodate multilevel analysis and the inclusion of contextual data in the ESS. Section E1.4 has more information on the region variable, and table E1 shows the recommended NUTS level for each country in the NUTS Nomenclature.

New administrative variables
In ESS round 5 the age (INTAGEA) and gender (INTGNDR) of the interviewers are included as administrative variables. These are no longer included in the interviewer questionnaire. See section E3 for more information. For CAPI countries there is a list of ten new administrative variables measuring the end-time for each module. These variables are listed in section E3.

In section E3 of the ESS round 5 Data Protocol there is a more thorough description of the administrative variables SPLTADMD (Administration of split ballot and MTMM), SUPQAD1 (Administration of supplementary questionnaire1) and SUPQAD2 (Administration of supplementary questionnaire 2) than was presented in the Data Protocol for ESS round 4.

Income, consultation process
In ESS round 5, NSD is introducing a consultation process on the income measure, which was new in round 4. The National Co-ordinators (NC's) are asked to pay particular attention on the income data source (benchmark data) with respect to time adjustment, income composition and household definition when constructing the income measure for ESS round 5. For more information on the income measure, please see section E1.5.

A. Procedures for the collaboration between the National Teams and NSD

The ESS Archive Intranet web site
The ESS Archive Intranet web site at http://essdata.nsd.uib.no/ will be the central meeting place between NSD and the National Teams during the data delivery and data processing phases of the project. One purpose of the ESS Archive Intranet web site is to give all parties in the project easy access to the common set of tools and utilities which are used in the planning and production of the data files. Another purpose is to make the data processing at NSD as transparent as possible. By using the ESS Archive Intranet web site, the National Teams can control their data delivery, and audit NSD's data processing.

The NSD team and primary contact persons
The responsibility for the ESS 2010 data at NSD is shared by a team of persons who are trained in the processing of comparative survey data. Each ESS country will be assigned a primary contact person. This person will have the main responsibility for the production of the country's data files. The NSD team has a project email address, essdata@nsd.uib.no. When you send emails to your contact person, please address them to the project email address. This will ensure that your emails are read even if your contact person is out of office.

Consultation process
Prior to the fieldwork period NSD will initiate a consultation process on three of the country-specific measures in ESS 2010: Education, religion and income. The National Teams will be asked to answer specific queries regarding coding templates (education and religion) and benchmark data information (income) well in advance of the start of the fieldwork. The purpose of the consultation process is to improve data quality, as well as ease the data processing burden post-fieldwork.

Data deposit
When electronic deliverables (see section B) are ready for delivery to the archive, the National Teams are kindly asked to use the "Deposit data" option on the ESS Archive Intranet web site. When the transfer is successfully completed, the NSD team will automatically be notified by the system. NSD will shortly after get in touch with the National Teams confirming the delivery.

Data processing
The "View archive processing" option on the ESS Archive Intranet web site gives the National Teams access to the data processing catalogue of their country. All programmes, data files and output used in the processing will be available for download, making the archive's work as transparent as possible. The production and cleaning of data will be based on a dialogue between NSD and the National Teams. Whenever the processing involves decisions not specified in the standard procedures, the National Team will be notified and asked for advice. Processing will be done in two steps, each followed by a report documenting the results.

Please be aware that if (parts of) the data files or documentation deviate too much from the specifications in the Data Protocol, the National Team might be asked to make a new delivery containing corrected data and/or documentation.

Data validation
When the processing of data is completed, the National Team will be notified and asked to go through NSD's data processing report and drafts of the country's data files for validation. Only

when the processing has been approved by the National Team can the files be finalised and included in the integrated files.

Please be aware that the draft file from NSD will be a trial dataset made available in confidence for the National Co-ordinator, so that preliminary analyses may be undertaken as a means of 'testing' the data in advance of their widespread distribution. The file should be available only to persons who have been registered by the CCT as members of the National Co-ordinator's team.

B. Electronic deliverables

The deadline for submitting *all* data and documentation files to the archive is *FEBRUARY 28th 2011*.

The National Teams are kindly asked to use the ESS Archive Intranet web site to deposit their files. All national data files that arrive fully documented and in adherence with the specifications of the Data Protocol, within the deadline, will be included in the first release of the integrated data file in October 2011. The processing of various country data arriving after the deadline will be executed on a "first come first served basis".

B1. Deliverables to NSD

The electronic deliverables to NSD include data files as well as text files documenting the national survey. When several files are submitted at the same time, please zip them into one file before uploading them to the ESS Archive. The data files should be delivered with variable names, labels and categories as specified in the Data Protocol (see section F and G).

Deliverables	Possible file formats	Comment
Data files		
1. Main and Supplementary questionnaire, with additional ESS variables. 2. Interviewer questionnaire 3. Contact form	• SPSS system file • SPSS portable file • SPSS set up, reading data file • SAS system file, Windows • SAS portable file • SAS set up, reading data file	See sections F1 - F3 and G in Data Protocol, and "Data Protocol and variable definitions" under *Prepare data* on the ESS Archive Intranet web site for specifications of files
4. Parents' occupation	• Same as 1-3, Delimited text format possible for verbatim recorded answers	See section B2 for specification of file
5. Raw data		See section B3 for specification of file
6. Sample design data file (SDDF)		See section B4 for specification on file
Documents		
5. National Technical Summary	• PDF form (recommended) • Word Processing Format	See section H in Data Protocol and "Survey documentation" on the ESS Archive Intranet web site
6. Population statistics 7. Main questionnaire 8. Supplementary questionnaire 9. Interviewer questionnaire 10. Contact form 11. Show cards	• Word Processing Format • ASCII text if txt is the only possible output from the CAPI system	In all languages fielded in the country Please compile the show cards in one file (one file for each language fielded in the country)
12. Interviewer and fieldwork instructions 13. Advance letters, brochures and other written information to the respondents	• Word Processing Format • PDF	
14. If CAPI: CAPI programmes	ASCII text	

B2. File 4: Parents' occupation

The main questionnaire includes questions about father's and mother's occupation when the respondent was 14 years old (F62 and F68). These verbatim recorded answers are not required to be post-coded, but can also be registered as string variables (in original language), and should be deposited in a separate file to be archived at NSD.

The file can have different formats, preferably SPSS or SAS, but delimited text files or spreadsheets can also be used. However, please make sure that the files can be transferred to a SPSS.por file. The files must contain, in addition to the two verbatim variables, the variables IDNO "RESPONDENT'S IDENTIFICATION NUMBER" and CNTRY "COUNTRY".

B3. Raw data

In addition to the anonymised and processed data files, the raw data are to be uploaded to the ESS Archive Intranet web site. By raw data we mean data as they were keyed, either in your CAPI system or from the questionnaires. If the verbatim recorded answers in F31, F33, F34, and F34a are available in electronic format, please include them in your deposit. This is also requested for any other verbatim recorded answers, such as any 'Other, write in' options. The preferred file formats for keyed raw data will be the same as for files 1 to 4, verbatim recorded answers can be delivered either in SPSS or SAS, or in delimited text format. The NSD treats raw data as non-anonymous, please see B8 for more information.

B4. Specifications and deposit of Sample design data files (SDDF)

The ESS Sampling team is responsible for the specifications and processing of the Sample design data files, and the co-operation will be organised directly between the National Team and their contact person in the Sampling team. The Sample design data files are, however, to be uploaded to the ESS Archive Intranet web site, and the deposit of these data is mandatory. The ESS round 5 data deposit will not be regarded as complete without this file. The Sample design data might be indirectly identifiable and thus non-anonymous. Please see B8 for more information.

B5. Common identifiers in data files

The files deposited to NSD should be prepared for merging, therefore all files must have common identifiers, i.e. respondents' identification number and country code (see section E2). The National Teams may deliver their data as separate files, or as one merged file, depending on what is most convenient in each country. Please make sure that the identification numbers are consistent across all data files.

B6. Checking data

The National Teams are asked to check and edit the data with respect to uniqueness and consistency of identification number(s), wild codes and data consistency. The final wild code checking should be done after the Data Protocol variable names, labels and categories have been applied to the national data files (see section G).

The minimum requirement is that all data verification and editing depending on access to questionnaires or CAPI files must be done prior to delivering the data to the ESS Archive.

The National Teams are asked to supply information about the coding and cleaning procedures in the national Technical Summaries (see section H).

B7. Anonymised data, files 1-4

In accordance with data protection regulations in participating countries, only anonymised data will be made freely available to users. Before depositing data to NSD, each National Team is responsible for checking their data with confidentiality in mind. The National Teams will be asked to confirm in their National Technical Summary that the data have been anonymised in accordance with national or EU regulations on protection of individuals with regard to the processing of personal data
(see http://ec.europa.eu/justice_home/fsj/privacy/).

The checking of anonymity has to be done under the premise that all four data files will be merged. Some standard precautions should be made to ensure that the ESS data files embody as much information as possible and still comply with the demands of confidentiality:

Basic precautions
File 1. Data from Main questionnaire and Supplementary questionnaire, with additional variables.
    a. IDNO - Respondent identification number: if the number makes it possible to identify the respondent, or a geographical area with a small population, encrypt the number before deposit
    b. REGIONxx - Region (country-specific variable): the categories of the variable should cover areas of large populations, and be in accordance with the requirements specified in section E1.4.

File 2. Interviewer's questionnaire
    a. IDNO - See above
    c. INTNUM - Interviewer identification number: if the number makes it possible to identify the interviewers or a geographical area with a small population, encrypt the number before deposit.

File 3. Contact forms
    a. IDNO - See above
    c. INTNUM - See above

File 4. Parents' occupation
    a. IDNO - See above
    d. Please remember that the files will be merged and that anonymity must be ensured also when the file is linked to other variables. The removal of county, city, or company names are an important factor in the anonymisation of these data.

Further precautions
Even if all individual and geographical identifiers are encrypted, the dataset contains a lot of factual information about the respondent. Combining information about gender, age, household, region of residence, citizenship, country of origin, parents' geographical origin, language, four-digit

occupation code, spouse's four-digit occupation code and textual information about Intranet might in some cases violate confidentiality. This depends on the population characteristics of the country and its regions, and anonymity must therefore be assessed at country level by each National Teams.

If anonymisation beyond the basic precautions (a-d) is necessary, it is recommended to use the following procedures in the following order:

  e.   Rounding
  f.   Substitution
  g.   Cell suppression

Please contact NSD in case precautions e, f, or g is necessary.

B8. Deposit of indirectly identifiable data, files 5 and 6.

Sample design data files (SDDF) and Raw Data
NSD are aware that not all SDDF data and raw data can be completely anonymised. NSD will obtain a license for handling these data from the Norwegian Data Inspectorate.

All EU and EEA countries are covered by this licence. If you are in doubt how this effects the deposit of your country's sample design data file and/or raw data, please contact NSD.

Storage and dissemination
The indirectly identifiable data will be stored in a safe environment not connected to any internal or external networks. Researchers can apply for temporary access to the data for research purposes. Access will only be given under strict confidentiality regulations, following the EU data directives.

C. Principles of variable definitions

C1. Missing values

Analysis of item non-response is an important part of quality control of survey items, and consistent use of missing values in the questionnaire and other documentation ensures uniform coding of skips in the interview. The aim is that the ESS data files will contain detailed information on item non-response.

The missing values in the data files are defined in the following way:

Not applicable: **6**, **66**, **666** etc., where the respondent has been routed away from the question. This missing value might be coded in the national data files before deposit, but the coding will be overwritten by standardised procedures at NSD.

Refusals: **7**, **77**, **777** etc., where the respondent has explicitly refused. This should be coded by the interviewers whether they use CAPI or PAPI.

Important notice:

In some questions an explicit refusal code is available. Otherwise, *"Refusal" shall not be included in the scale or the list of answer categories presented to the interviewer in the questionnaire:*

1. Those using CAPI: Place "Refusal" as an option for the interviewer, for example on the top menu of the screen where "Don't know" is usually placed.
2. Those using PAPI and manual registration of the questionnaires: Instruct the interviewers to write (an abbreviation of) "Refusal" at the item. Instruct the registration operators to write in the same number of 7s as there are 8s in "Don't know".
3. Those using PAPI and optical scanning of the questionnaires: The questionnaire should have an administrative column with a "refusal" box identifiable for the scanning programme.

Don't know: **8**, **88**, **888** etc. These codes are almost always available. They can be included in the list of answering options presented to the interviewers, or placed in administrative columns, menus etc., depending on the routines of the survey organisation.

No answer: **9**, **99**, **999** etc. are codes for missing data not elsewhere explained, for example respondent/interviewer errors and production/system errors. This missing value might be coded in the national data files before deposit, but the coding will be overwritten by standardised procedures at NSD. In administrative variables and interviewer codes, 9, 99, 999 etc. are labelled "Not available".

C2. Multiple responses and missing values

In general, we think of multiple response as the result of a "mark all that apply" question, or "mention all that you think of" in open-ended questions. Examples of multiple response questions are "In which countries have you been on holiday during the last five years?" (open) and "Here is a list of voluntary organisations. Please tell me which of these organisations you are a member of" (closed).

In the ESS 2010 data files, multiple response variables will have the values 0 "Not marked" and 1 "Marked". Each group of multiple response variables will have one or more additional dichotomous variables for missing values.

One example is question F46a about what partner has been doing last 7 days, which results in the variables DWRKP, EDCTNP, UEMPLAP, UEMPLIP, DSBLDP, RTRDP, CMSRVP, HSWRKP, DNGOTHP, DNGDKP (Don't know) AND DNGREFP (Refusal). In addition, DNGNAPP (Not applicable) and DNGNAP (No answer) will be included in the data file. DNGNAPP and DNGNAP will be overwritten by standardised procedures at NSD, but can either be coded, or assigned the value 0 (zero) or system missing in the national data files. In countries where CMSRVP is not applicable, the variable should be assigned the value 0 (zero) or system missing.

If the respondent does not have a partner, all variables will be assigned the value 0, except DNGNAPP (DOING LAST 7 DAYS, PARTNER: NOT APPLICABLE), which will be assigned the value 1. Correspondingly, if the respondent refuses to answer the question, DNGREFP should be coded as 1, the rest 0.

The following questions and variables are defined as multiple responses in the ESS 2010 questionnaires. Please ensure that the PROBE/PROMPT/"Code all that apply" instructions to the interviewers are included in the questionnaire.

C25:
DSCRRCE - DSCRNA
F17a:
PDWRK - DNGNA
F46a:
PDWRKP – DNGNAP
J6:
PREWHP – PRENA

If not applicable, **F17a**: CMSRV "DOING LAST 7 DAYS: COMMUNITY OR MILITARY SERVICE" and **F46a**: CMSRVP "PARTNER DOING LAST 7 DAYS: COMMUNITY OR MILITARY SERVICE" should be assigned the value 0 (zero) or system missing.

C3. Formats
The formats of variables are defined in the tables in section F. All numeric variables in the ESS 2010 data files have the formats Fn.0, i.e. they are of width n and with no decimals. String variables have the formats An, with "n" assigning the number of characters.

The missing values often decide the format. If a routed variable have a scale from 1 to 5, there is room for "Not applicable" in value 6, and the variable will have the format F1.0. If the scale goes up to 6, the missing values have to begin at 66, and the format changes to F2.0.

C4. Variable names
The principles of variable definitions are bound by two factors: the limitations in statistical packages and the concern for user-friendly metadata. These factors limit the length of variable documentation included in the data files.

The CCT has decided to use *mnemonic* variable names in the data files. The argument is that about half of the questionnaire (the Core) is replicated in all rounds of the ESS, and that we expect the

replication of rotating modules later on. By using mnemonic variable names, different data files contain the same variable names for identical questions, making it easier for the users as well as the producers of cumulative files for several ESS rounds.

To ensure consistency in variable names, NSD has set up an internal guideline for abbreviations of frequently used concepts and words in questionnaires. The table below gives one example:

Concept	Abbreviation
Police	PLC
:	:
Trust	TRST/TST

Thus, question B6, "Trust in the police" becomes TRSTPLC.

In many statistical packages, the upper limit of variable names is eight characters. In order to allow for versions of a variable, the limit in ESS is seven characters, leaving space for documenting new versions of the variable with characters (A, B, C, etc.) as suffix. For example, between ESS round 1 and 2 the variable WRKCTR "Employment contract unlimited or limited duration" was changed to WRKCTRA, due to a new category that was added.

C5. Variable labels and categories

The most commonly used statistical packages allow for up to 255 characters in variable labels, but in the ESS data files variable labels will be limited to approximately 70 characters. One reason is that the user should be able to grasp the content "in one glance"; another reason is the formatting of outputs from the statistical packages.

For the same reasons, categories (value labels) are limited to approximately 40 characters.

D. Standards and classifications

The ESS Archive Intranet web site at http://essdata.nsd.uib.no/ contains all coding standards and coding frames not documented in the source questionnaire or in the Data Protocol. All verbatim recorded answers *except F62 and F68* (see section E1.6) have to be post-coded according to international standards found on the ESS Archive Intranet web site. In addition, some questions with country-specific design and categories have to be recoded into a common ESS coding frame.

The coding frames available on the ESS Archive Intranet web site are compiled for use by the ESS 2010. They will remain fixed for the 2010 survey, and they are to be considered as the *only valid standards* to be used.

D1. International standards

International standards have to be used in the post-coding of certain questions:

D1.1 ISO 3166-1, Country
C27: CTZSHIPB "CITIZENSHIP"
C29: CNTBRTHB "COUNTRY OF BIRTH"
C34: FBRNCNTA "COUNTRY OF BIRTH, FATHER"

C36: MBRNCNTA "COUNTRY OF BIRTH, MOTHER"

Format: A2

Comment: Revised standard for ESS5. The documents for download from the ESS Archive Intranet web site also includes six transitional code elements added by NSD: "01" for DDR, "02" for USSR, "03" for Czechoslovakia, "04" for Yugoslavia, "05" for East Timor and "06" for Serbia and Montenegro.

D1.2 ISO 639-2, Language

C31: LNGHOM1 "LANGUAGE MOST OFTEN SPOKEN AT HOME: FIRST MENTIONED"

LNGHOM2 "LANGUAGE MOST OFTEN SPOKEN AT HOME: SECOND MENTIONED"

J7: INTLNGA "INTERVIEW QUESTIONNAIRE LANGUAGE"

Format: A3

Comment: Upgraded standard for ESS5. To simplify the coding of question C31, the most common language(s) in a country can be listed for each of the two items, and if necessary be recoded into the three-character ISO 639-2.

Example: In Slovenia, the answer "Slovenian" can be marked by a tick in the questionnaire, and then registered as "slv" or "1" ("1" later to be recoded to "slv" before deposit).

D1.3 ISCO88 (com), Occupation

F33—F34a: ISCOCO "OCCUPATION, ISCO88 (COM)"

F48-F50: ISCOCOP "OCCUPATION PARTNER , ISCO88 (COM)"

Format: F5.0 (4-digit coding of occupations, missing values having the format F5.0)

Comment: Standard also used in ESS4. The ESS 2010 questionnaire includes three questions to be used in the post-coding of occupation: title, description of work and qualifications needed (F33-F34a resulting in ISCOCO for respondent, F48-F50 resulting in ISCOCOP for partner). In addition, F24 and F31 should be used in the post-coding of respondent's occupation. These two questions are particularly helpful in the coding of managers in the ISCO major group 1, distinguishing between large and small enterprises and between industries.

Notes: For an introduction, please read "A Guide for Users" (Elias and Birch 1994), available at the ESS Archive Intranet web site through "Standards for post coded variables". This does also apply to countries already familiar with the ISCO (com). Every country must ensure that the national coding frame and transition table comply with the standard found on the ESS Archive Intranet web site. The value labels/formats files described in section G can be used to check for compliance with the standard.

The ISCO (com) standard includes codes on 1, 2, 3 and 4 digit levels, while the variables in the data file should have categories on four-digit level only (except Armed forces, code 100). Where no distinction is made below the level of major, sub-major or minor group, a corresponding four-digit category should be achieved by the addition of trailing zeros (see Elias and Birch, p. 13). For example, if occupation is registered as 11 (Legislators and senior officials), the value in the data file should be 1100. To further assist the National Teams with the coding of occupation into ISCO, we have also made available a practical guide on the coding of occupations by Harry Ganzeboom on the ESS Archive Intranet web site.

D1.4 NACE Rev.2 (2-digit version), Industry

F31: NACER2 "INDUSTRY, NACE REV.2"

Format: F3.0 (2-digit coding of industry, missing values having the format F3.0)

Comment: Revised standard in ESS5. Due to an increase in sections (1st digit) and divisions (2nd digit), correspondence between NACE Rev.2 and NACE Rev.1.1 at the 2-digit level is not possible. It is therefore essential that NACE Rev.2 is used for the coding of industry in the ESS 2010.

Notes: For a detailed description of NACE Rev.2, please see "NACE Rev.2 – Statistical Classification of Economic Activity", available at the ESS Archive Intranet web site through "Standards for post coded variables".

D2. ESS Coding frames

Common ESS coding frames apply to the following questions:

D2.1 Coding frame - Religion

C18: RLGDNM "RELIGION OR DENOMINATION BELONGING TO AT PRESENT"

C20: RLGDNME "RELIGION OR DENOMINATION BELONGING TO IN THE PAST"

Comment: Coding frame also used in ESS4. See ESS Archive Intranet web site. There will be a consultation process on the religion measure in Round 5 well in advance of the fieldwork period, where the National Teams are asked to revise the religion measure used in ESS4. Please use the coding and bridging agreed upon with the archive in the consultation process. If a country-specific instrument is used, the country-specific variables should be deposited.

D2.2 ESS Coding frame – Education

F15: EDULVLA "HIGHEST LEVEL OF EDUCATION, DETAILED ISCED"
      [EISCED "HIGHEST LEVEL OF EDUCATION, ES - ISCED"]

Comment: In ESS5 the ESS coding frame will change from the 7-category ISCED-97 based coding frame used in ESS Round 1 to 4, to a more detailed ISCED-97 coding with up to 25 codes (EDULVLA). There will also be an additional 7-category variable (EISCED) that will be mapped at NSD from the new detailed ISCED measure. Both variables will be based on a country-specific education variable, which will have to be changed for most countries in Round 5.

NSD and City are arranging a consultation process on education to help the National Teams in the category set-up and bridging of the new measures. Silke Schneider, Nuffield College, Oxford, will act as an external expert to ensure a correct mapping from national variables into the new measures.

For an overview of changes to the educational measures in Round 5, as well as on the Round 5 consultation process on education, please see E1.3 and the "Educational measures in Round 5" document at the Archive Intranet web site.

Please use the coding and bridging which was agreed upon with the education expert, NSD and City in the consultation process on education.

Notes: Additional information about the educational measures in Round 5 is available at section A, E1.3 and F1.f in the Data Protocol, as well as in the "Educational measures in Round 5" document at the Archive Intranet web site.

F45: EDULVLPA "PARTNER'S HIGHEST LEVEL OF EDUCATION, detailed ISCED"
     [EISCEDP   "PARTNER'S HIGHEST LEVEL OF EDUCATION, ES - ISCED"]
F58: EDULVLFA "FATHER'S HIGHEST LEVEL OF EDUCATION, detailed ISCED"
     [EISCEDF   "FATHER'S HIGHEST LEVEL OF EDUCATION, ES - ISCED"]
F64: EDULVLMA "MOTHER'S HIGHEST LEVEL OF EDUCATION, detailed ISCED"
     [EISCEDM "MOTHER'S HIGHEST LEVEL OF EDUCATION, ES - ISCED"]

Comment: The same instruments, bridgings and variables as for the respondent should be produced for partner, father and mother.

E. Country-specific, identification and administrative variables

E1. Country-specific variables

E1.1 Naming and use of suffix

Country-specific variables are marked with the suffix xx in the variable name. Whenever a country-specific variable is included in a national data file, the xx suffix in the variable name should be substituted by the two-character country code of ISO 3166-1. Country-specific variables in ESS5 are: PRTVTxx (B12), (PRTVxx1- PRTVxxN if more than one national election)
     PRTCLxx (B20b)
     PRTMBxx (B22)
     RLGDNxx (C18), RLGDEXX (C20)
     EDLVDxx (F15), EDLVPDXX (F45), EDLVFDXX (F58), EDLVMDXX (F64)
     REGIONxx

Table E1. Country codes for countries in ESS 2010 (including possible participants):

Country	Code	Country	Code
Austria	AT	Latvia	LV
Belgium	BE	Lithuania	LT
Bulgaria	BG	Netherlands	NL
Croatia	HR	Norway	NO
Cyprus	CY	Poland	PL
Czech Republic	CZ	Portugal	PT
Denmark	DK	Romania	RO
Estonia	EE	Russia	RU
Finland	FI	Slovakia	SK
France	FR	Slovenia	SI
Germany	DE	Spain	ES
Greece	GR	Sweden	SE
Hungary	HU	Switzerland	CH
Ireland	IE	Turkey	TR
Israel	IL	Ukraine	UA
Italy	IT	United Kingdom	GB

Example: In section F of the Data Protocol and in the SPSS and SAS programmes available at the ESS Archive Intranet web site, the variable name of country-specific highest level of education (question F15) is EDLVDxx. The country-specific variables on respondent's highest level of education in Slovakia and Portugal should be renamed EDLVDSK and EDLVDPT, respectively.

Any change in country-specific variables from ESS round 4, extra categories etc., should be documented in the National Technical Summary.

E1.2 Political party
B12: PRTVTxx "PARTY VOTED FOR IN LAST NATIONAL ELECTION"
      PRTVxx1 "PARTY VOTED FOR IN LAST NATIONAL ELECTION 1"
      PRTVxxN "PARTY VOTED FOR IN LAST NATIONAL ELECTION N"

These items need to be country-specific due to differences in electoral and party systems between countries. There will be two main groups of countries using different principles of organising the data:

i. Only one single vote registered.
ia. Countries where only one national-level election takes places.
Comment: None
ib. Countries where multiple national-level elections take place.
Comment: Please ask about the last election for the **primary legislative assembly**.
⇒ **Principle 1**. Countries belonging to group i. rename PRTVTxx, and use their national list of parties as categories. PRTVxx1 – PRTVxxN are **not** included in these data files.

ii. Two or more votes registered.
iia. Countries where voters have **more than one vote for the same assembly** (e.g. parallel and mixed member proportional systems; double ballot systems)
Comment: Please ensure that both/all votes are supplied.
iib. Countries using **preferential systems** (e.g. Single Transferable Vote or Alternative Vote).
Comment: Please provide first and second preference vote.
⇒ **Principle 2**. Ranking of votes possible: These countries use the variables PRTVxx1 – PRTVxxN to register the N votes. PRTVTxx is derived from PRTVTxx1 – PRTVxxN, and provided with a label documenting that the variable is derived from these variables. The national lists of parties are used as categories.
⇒ **Principle 3**. Ranking of votes **not** possible: Please use the variables PRTVxx1 – PRTVxxN to register the N votes and add their national list of parties as categories. The variable PRTVTxx is **not** included in these data files.

The overview below sums up the principles:

	Ranking of votes/preference	
Number of votes registered	Possible	Not possible
Only one	Principle 1. Only PRTVTxx included	
Two or more	Principle 2. PRTVTxx (derived) and PRTVxx1 – PRTVxxN included	Principle 3. Only PRTVxx1 – PRTVxxN included

B20b: PRTCLxx "WHICH PARTY FEEL CLOSER TO"

B22:   PRTMBxx "MEMBER OF WHICH PARTY"

Unless there have been any changes to the political parties, please use the country-specific categories that were used in ESS 2008.

E1.3 Education

F15: EDLVDxx "HIGHEST LEVEL OF EDUCATION, [COUNTRY]"

F45: EDLVPDxx "PARTNER'S HIGHEST LEVEL OF EDUCATION, [COUNTRY]"

F58: EDLVFDxx "FATHER'S HIGHEST LEVEL OF EDUCATION, [COUNTRY]"

F64: EDLVMDxx "MOTHER'S HIGHEST LEVEL OF EDUCATION, [COUNTRY]"

Many countries will need to change their country-specific instruments measuring highest level of education due to the requirement of the new coding frame in Round 5 (See D2.2 and the "Educational measures in Round 5" document at the Archive Intranet web site for more information).

Please provide the country-specific variables on respondent's highest level of education, as well as for partner, father and mother. Only one country-specific variable per measurement will be included in the integrated data file. If more than one country-specific variable is needed for each measurement, a combined variable must be deposited for each measurement. In addition, all variables that have been used in the measurement of highest level of education must be deposited to the archive. These variables will be made available from a separate country-specific file for [COUNTRY].

Please use the Latin alphabet with additional symbols as needed in the different languages in [COUNTRY] for the country-specific categories.

E1.4 Region

REGIONxx "REGION"

This variable is not derived from the questionnaire but should be included in File 1 (see section F1).

As of ESS round 5 the specifications for the REGIONxx variables have changed. The new specifications presented here aim to accommodate for multilevel analysis and the inclusion of contextual data in the ESS. Thus, all countries included in the Nomenclature of Territorial Units for Statistics (NUTS) established by Eurostat, are asked to provide regional variables according to the NUTS level classification. Please see: http://epp.eurostat.ec.europa.eu/cache/ITY_OFFPUB/KS-RA-07-020/EN/KS-RA-07-020-EN.PDF for the current NUTS nomenclature and http://epp.eurostat.ec.europa.eu/cache/ITY_OFFPUB/KS-RA-07-023/EN/KS-RA-07-023-EN.PDF for statistical regions for the EFTA countries and the Candidate countries (2008).

Furthermore, the applied NUTS level for the regional variables should ideally correspond to an administrative level within each country. Which NUTS level that corresponds to an administrative level will vary from country to country. Please see table E.1 for a list of recommended NUTS levels to be used. For any queries regarding the national coding of the REGIONxx variable, please contact the ESS Data Archive (essdata@nsd.uib.no).

For countries <u>not</u> included in the NUTS nomenclature (currently Israel, Ukraine and Russia), please use regional categories that are administrative units and where it is possible to attach contextual data from national records/registers.

All in all, the units in REGIONxx should meet the following demands:

A) For countries in the NUTS nomenclature:
1. Please use the recommended NUTS levels as presented in table E.1
2. Please ensure that the population of each unit will be large enough to ensure anonymity of the respondents.
3. Please use the official NUTS codes and labels from the NUTS Nomenclature as values and categories for the country-specific variables (alphanumeric).
   Examples:
   Value: HR011   Category: Grad Zagreb
   Value: DK04   Category: Midtjylland
   Value: DEA   Category: Nordrhein-Westfalen

B) For countries not included in the NUTS nomenclature:
1. Please use regional categories that are administrative units and where it is possible to attach contextual data from national records/registers.
2. Please ensure that the population of each unit will be large enough to ensure anonymity of the respondents.

Table E1. Recommended[1] NUTS level for REGIONxx variable

Country	Country code	Suggested NUTS level	Number of regions
Austria	AT	2	9
Belgium	BE	2	11
Bulgaria	BG	3	28
Croatia	HR	3	21
Cyprus	CY	1	1
Czech Republic	CZ	3	14
Denmark	DK	2	5
Estonia	EE	3	5
Finland	FI	3	20
France	FR	2	26
Germany	DE	1	16
Greece	GR	2	13
Hungary	HU	3	20
Ireland	IE	3	8
Israel	IL	No NUTS coding.	
Italy	IT	2	21
Latvia	LV	3	6
Lithuania	LT	3	10
Netherlands	NL	2	12
Norway	NO	3	19
Poland	PL	2	16

---

[1] Data could be deposited on lower levels. If for example NUTS level 2 is recommended, it is possible to use level 3 in the data file sent to the Archive.

Portugal	PT	2	7
Romania	RO	2	8
Russian Federation	RU	No NUTS coding.	
Slovakia	SK	3	8
Slovenia	SI	3	12
Spain	ES	2	19
Sweden	SE	3	21
Switzerland	CH	3	26
Turkey	TR	1	12
Ukraine	UA	No NUTS coding	
United Kingdom	GB	1	12

E1.5 Income

F41: HINCTNTA "HOUSEHOLD'S TOTAL NET INCOME, ALL SOURCES"

The categories are to be based on deciles of the actual household income range in the given country. The deciles should be derived from the best available source for the country and match the requirement of the question. Possible sources for the calculation of deciles can be national register data, or representative country wide surveys (for example the EU–SILC). Regarding the benchmark data source, National Teams are asked, through a special consultation process, to place particular emphasis on the following aspects:

- Deciles should refer to household income for all households, unadjusted for size or type;
- Deciles should refer to household's total income, after tax and compulsory deductions, from all sources;
- Deciles should reflect household income at the time of fieldwork, and thus be adjusted to 2010 level if necessary.

Using the median income as the reference point, 10 deciles should be calculated with the median itself at the top of the fifth decile (category F). The figures should not appear to be too exact. Minor rounding can be applied to achieve this if necessary. The deciles should be reported in national currency and the conversion rate to euros should be documented in the National Technical Summary, by the formula

1 [national currency] = x.xx €.

The intervals of the categories in CARD 55 are:

CARD 55
YOUR HOUSEHOLD INCOME

Show card code	Approximate WEEKLY	Approximate MONTHLY	Approximate ANNUAL	Data file code
J	Less than €xx	Less than €xxx	Less than €xxx	01
R	€xx to under €xx	€xxx to under €xxx	€xxx to under €xxx	02
C	€xx to under €xx	€xxx to under €xxx	€xxx to under €xxx	03
M	€xx to under €xx	€xxx to under €xxx	€xxx to under €xxx	04
F	€xx to under €xx	€xxx to under €xxx	€xxx to under €xxx	05
S	€xx to under €xx	€xxx to under €xxx	€xxx to under €xxx	06
K	€xx to under €xx	€xxx to under €xxx	€xxxto under €xxx	07
P	€xx to under €xx	€xxx to under €xxx	€xxx to under €xxx	08

D	€xx to under €xx	€xxx to under €xxx	€xxxto under €xxx	09
H	More than €xx	More than €xxx	More than €xxx	10

A show card must always be used at this question. The ten rows on the show card should display the income ranges selected and be presented by the ten letters above (or their equivalent when other alphabets are used) which helps to ensure respondent confidentiality. Each country can choose whether to include weekly, monthly, or annual amounts on the showcard or whether they want to include more than one of these as appropriate. The text in the last sentence of the question should be rephrased to match the solution selected. If you have any questions or queries regarding this, please direct them to ess@city.ac.uk

E1.6 Parents' occupation
F62 and **F68**: PARENTS' OCCUPATION.

The main questionnaire includes questions about father's and mother's occupation when respondent was 14 years old (F62 and F68). These verbatim recorded answers are not required to be post-coded, but can be registered as string variables (in original language), and be deposited in a separate file to be archived at NSD.

E2. Respondent identification number and country

IDNO "RESPONDENT'S IDENTIFICATION NUMBER"
Identifies the respondent uniquely in the national data files.
CNTRY "COUNTRY"
The categories of the variable are the two-character country codes in ISO 3166-1. In the Polish data file, for example, the variable will have the value "PL" for all respondents. Please see table E1 for the codes of countries (possibly) participating in ESS 2010.
To be included in **all** data files (see section F).

IDNO and CNTRY together uniquely identify the respondent in the integrated data files. By sorting integrated data files by CNTRY IDNO (in that order) and thereafter using CNTRY IDNO (in that order) as "key" or "by" variables in match/merge statements, the match/merge will be correct.

E3. Administrative variables

Interviewer number, interviewer age and gender
Interviewer data file variables:
J8 INTNUM "INTERVIEWER'S IDENTIFICATION NUMBER"
Identifies each interviewer unikely in the Interviewer data file.

INTAGEA "AGE OF INTERVIEWER"
Identifies the age of each interviewer.
There is no item in the interviewer questionnaire for this. Please record the age of each interviewer and prepare the variable after the fieldwork has been completed.

INTGNDR "GENDER OF INTERVIEWER"
Identifies the gender of each interviewer.

There is no item in the interviewer questionnaire for this. Please record the age of each interviewer and prepare the variable after the fieldwork has been completed.

To be included in File 2 (see table F.2)

Start of interview, main questionnaire (sections A-G):
INWDDS "START OF INTERVIEW, DAY OF MONTH"
INWMMS "START OF INTERVIEW, MONTH"
INWYYS "START OF INTERVIEW, YEAR"
INWSHH "START OF INTERVIEW, HOUR"
INWSMM "START OF INTERVIEW, MINUTE"

End of interview, main questionnaire (sections A-G):
INWDDE "END OF INTERVIEW, DAY OF MONTH"
INWMME "END OF INTERVIEW, MONTH"
INWYYE "END OF INTERVIEW, YEAR"
INWEHH "END OF INTERVIEW, HOUR"
INWEMM "END OF INTERVIEW, MINUTE"
To be included in File 1 (see table F.1i).

For CAPI countries:

In ESS 2010 CAPI countries are also asked to provide timings for each module within the questionnaire. These countries are therefore also asked to deliver the following administrative variables:
AINWEHH "END OF MODULE A, HOUR"
AINWEMM "END OF MODULE A, MINUTE"
BINWEHH "END OF MODULE B, HOUR"
BINWEMM "END OF MODULE B, MINUTE"
CINWEHH "END OF MODULE C, HOUR"
CINWEMM "END OF MODULE C, MINUTE"
DINWEHH "END OF MODULE D, HOUR"
DINWEMM "END OF MODULE D, MINUTE"
FINWEHH "END OF MODULE F, HOUR"

Administration of Supplementary questionnaire
SPLTADMD "ADMINISTRATION OF SPLIT BALLOT AND MTMM"

This variable has a dual aim:
1. To identify the mode of administration of the supplementary questionnaire in your country, which is either face – to – face interview or self completion. Note that SPLTADMD is measuring the *intended* mode of administration at the design stage, not the one that was actually used.
2. To identify which question block in the MTMM section of the supplementary questionnaire that the respondent is asked.

To be included in File 1 (see table F.1i).

Variables from the Interviewer's questionnaire:

J10 SUPQAD1 "ADMINISTRATION OF SUPPLEMENTARY QUESTIONNAIRE 1"
This variable should only be included if the mode of administration of the supplementary questionnaire in your country is self-completion. This variable identifies if the supplementary questionnaire was implemented as self completion (as planned) or, was actually carried out as a face-to face interview.

J13 SUPQAD2 "ADMINISTRATION OF SUPPLEMENTARY QUESTIONNAIRE 2"
This variable should only be included if the mode of administration of the supplementary questionnaire in your country is face-to-face interview. This variable identifies if the supplementary questionnaire was implemented as a face-to face interview (as planned) or, actually used self-completion methods.

To be included in File 2 (see table F.2)

Date of completion of Supplementary questionnaire (sections H and I):
SUPQDD "DAY OF MONTH, SUPPLEMENTARY QUESTIONNAIRE"
SUPQMM "MONTH, SUPPLEMENTARY QUESTIONNAIRE"
SUPQYR "Year, SUPPLEMENTARY QUESTIONNAIRE"
To be included in File 1 (see table F.1i).

F. Variable definitions and flowchart

Tables F.1a-j, F.2 and F.3 document the official formats and contents of the variables in the ESS 2010 data files. The tables document the question number, the variable label, format and categories of each variable. The last column has information about skips, coding standards etc. Please use the tables, the flowchart in section F.4 and the source questionnaires simultaneously when setting up national questionnaires and data programmes.

Table F.1a. Data file 1: Main questionnaire, section A. Idno and Cntry.

Qno	Name	Label	Format	Values	Categories	Comment
	IDNO	RESPONDENT'S IDENTIFICATION NUMBER	F9.0			See section E.2

File 1: Main and supplementary questionnaires

IDNO	Respondent's identification number
CNTRY	Country
TVTOT	A1|TV watching, total time on average weekday
TVPOL	A2|TV watching, news/politics/current affairs on average weekday
RDTOT	A3|Radio listening, total time on average weekday
RDPOL	A4|Radio listening, news/politics/current affairs on average weekday
NWSPTOT	A5|Newspaper reading, total time on average weekday
NWSPPOL	A6|Newspaper reading, politics/current affairs on average weekday
NETUSE	A7|Personal use of internet/e-mail/www
PPLTRST	A8|Most people can be trusted or you can't be too careful
PPLFAIR	A9|Most people try to take advantage of you, or try to be fair
PPLHLP	A10|Most of the time people helpful or mostly looking out for themselves
POLINTR	B1|How interested in politics
TRSTPRL	B4|Trust in country's parliament
TRSTLGL	B5|Trust in the legal system
TRSTPLC	B6|Trust in the police
TRSTPLT	B7|Trust in politicians
TRSTPRT	B8|Trust in political parties
TRSTEP	B9|Trust in the European Parliament
TRSTUN	B10|Trust in the United Nations
VOTE	B11|Voted last national election
PRTVTxx	B12|Party voted for in last national election, [country]
PRTVxx1	B12|Party voted for in last national election 1, [country]
PRTVxx2	B12|Party voted for in last national election 2, [country]
CONTPLT	B13|Contacted politician or government official last 12 months
WRKPRTY	B14|Worked in political party or action group last 12 months
WRKORG	B15|Worked in another organisation or association last 12 months
BADGE	B16|Worn or displayed campaign badge/sticker last 12 months
SGNPTIT	B17|Signed petition last 12 months
PBLDMN	B18|Taken part in lawful public demonstration last 12 months
BCTPRD	B19|Boycotted certain products last 12 months
CLSPRTY	B20a|Feel closer to a particular party than all other parties
PRTCLxx	B20b|Which party feel closer to, [country]
PRTDGCL	B20c|How close to party
MMBPRTY	B21|Member of political party
PRTMBxx	B22|Member of which party, [country]
LRSCALE	B23|Placement on left right scale
STFLIFE	B24|How satisfied with life as a whole
STFECO	B25|How satisfied with present state of economy in country
STFGOV	B26|How satisfied with the national government
STFDEM	B27|How satisfied with the way democracy works in country
STFEDU	B28|State of education in country nowadays
STFHLTH	B29|State of health services in country nowadays
GINCDIF	B30|Government should reduce differences in income levels
FREEHMS	B31|Gays and lesbians free to live life as they whish
PRTYBAN	B32|Ban political parties that wish overthrow democracy
SCNSENV	B33|Modern science can be relied on to solve environmental problems
IMSMETN	B35|Allow many/few immigrants of same race/ethnic group as majority
IMDFETN	B36|Allow many/few immigrants of different race/ethnic group from majority
IMPCNTR	B37|Allow many/few immigrants from poorer countries outside Europe
IMBGECO	B38|Immigration bad or good for country's economy
IMUECLT	B39|Country's cultural life undermined or enriched by immigrants
IMWBCNT	B40|Immigrants make country worse or better place to live
HAPPY	C1|How happy are you
SCLMEET	C2|How often socially meet with friends, relatives or colleagues
INMDISC	C3|Anyone to discuss intimate and personal matters with
SCLACT	C4|Take part in social activities compared to others of same age
CRMVCT	C5|Respondent or household member victim of burglary/assault last 5 years
AESFDRK	C6|Feeling of safety of walking alone in local area after dark
BRGHMWR	C7|How often worry about your home being burgled

BRGHMEF	C8|Worry about home burgled has effect on quality of life
CRVCTWR	C9|How often worry about becoming a victim of violent crime
CRVCTEF	C10|Worry about becoming victim of violent crime has effect on quality of life
HEALTH	C15|Subjective general health
HLTHHMP	C16|Hampered in daily activities by illness/disability/infirmary/mental problem
RLGBLG	C17|Belonging to particular religion or denomination
RLGDNM	C18|Religion or denomination belonging to at present
RLGDNXX	C18|Religion or denomination belonging to at present, [country]
RLGBLGE	C19|Ever belonging to particular religion or denomination
RLGDNME	C20|Religion or denomination belonging to in the past
RLGDEXX	C20|Religion or denomination belonging to in the past, [country]
RLGDGR	C21|How religious are you
RLGATND	C22|How often attend religious services apart from special occasions
PRAY	C23|How often pray apart from at religious services
DSCRGRP	C24|Member of a group discriminated against in this country
DSCRRCE	C25|Discrimination of respondent's group: colour or race
DSCRNTN	C25|Discrimination of respondent's group: nationality
DSCRRLG	C25|Discrimination of respondent's group: religion
DSCRLNG	C25|Discrimination of respondent's group: language
DSCRETN	C25|Discrimination of respondent's group: ethnic group
DSCRAGE	C25|Discrimination of respondent's group: age
DSCRGND	C25|Discrimination of respondent's group: gender
DSCRSEX	C25|Discrimination of respondent's group: sexuality
DSCRDSB	C25|Discrimination of respondent's group: disability
DSCROTH	C25|Discrimination of respondent's group: other grounds
DSCRDK	C25|Discrimination of respondent's group: don't know
DSCRREF	C25|Discrimination of respondent's group: refusal
DSCRNAP	C25|Discrimination of respondent's group: not applicable
DSCRNA	C25|Discrimination of respondent's group: no answer
CTZCNTR	C26|Citizen of country
CTZSHIPB	C27|Citizenship
BRNCNTR	C28|Born in country
CNTBRTHB	C29|Country of birth
LIVECNTA	C30|What year you first came to live in country
LNGHOM1	C31|Language most often spoken at home: first mentioned
LNGHOM2	C31|Language most often spoken at home: second mentioned
BLGETMG	C32|Belong to minority ethnic group in country
FACNTR	C33|Father born in country
FBRNCNTA	C34|Country of birth, father
MOCNTR	C35|Mother born in country
MBRNCNTA	C36|Country of birth, mother
INSCLWR	D1|How wrong to make exaggerated or false insurance claim
BYSTLWR	D2|How wrong to buy something that might be stolen
TRFOWR	D3|How wrong to commit traffic offence
INSCLCT	D4|How likely to be caught if made exaggerated or false insurance claim
BYSTLCT	D5|How likely to be caught if bought something that might be stolen
TRFOCT	D6|How likely to be caught if committed traffic offence
PLCJBCN	D7|Police doing good or bad job in country
PLCCONT	D8|Approached, stopped or contacted by police last 2 years
PLCSTF	D9|How satisfied with treatement from police when contacted
PLCVCRP	D10|How police treat victims of crime: Rich/poor
PLCVCRC	D11|How police treat victims of crime: Different races/ethnic groups
PLCPVCR	D12|How successful police are at preventing crimes in country
PLCCBRG	D13|How successful police are at catching house burglars in country
PLCARCR	D14| How quicly would police arrive at a violent crime/burglary scene near to where you live
PLCRSPC	D15|How often do police treat people in country with respect
PLCFRDC	D16|How often do police make fair, impartial decisions
PLCEXDC	D17|How often do the police explain their decisions and actions when asked
BPLCDC	D18|Duty to: back decisions made by police, even if disagree
DOPLCSY	D19|Duty to: do what police say, even when don't understand or agree
DPCSTRB	D20|Duty to: do what police say, even if treated badly
PLCRGWR	D21|Police have the same sense of right and wrong as me
PLCIPVL	D22|Police stand up for values that are important to people like me

GSUPPLC	D23|I generally support how the police act	
PLCIPLT	D24|Decisions and actions of police unduly influenced by political pressure	
PLCCBRB	D25|How often do police in country take bribes	
CTJBCNT	D26|Courts doing good or bad job in country	
CTMTGFR	D27|How often the courts make mistakes that let guilty people go free	
CTFRDC	D28|How often the courts make fair, impartial decisions based on available evidence	
WRACCRP	D29|More likely to be found guilty: Rich or poor falsely accused of crime	
WRACCRC	D30|More likely to be found guilty: Two people from different race/ethic groups falsely accused of crime	
JDGCBRB	D31|How often judges in country take bribes	
CTPRPWR	D32|Courts protect rich and powerful over ordinary people	
HRSHSNTA	D33|People who break the law much harsher sentences	
DBCTVRD	D34|Everyone's duty to back the court's final verdict	
LWSTROB	D35|All laws should be strictly obeyed	
RGBRKLW	D36|Doing the right thing sometimes means breaking the law	
CTINPLT	D37|The Courts' decisions are unduly influenced by political pressure	
STCBG2T	D38|Which sentence: 25 year old male, house burglary, second time	
TMPRS	D39|How long should he spend in prison	
CAPLCST	D40|How likely to call police if you see a man get his wallet stolen	
WIDPRSN	D41|How willing to identify person who had done it	
WEVDCT	D42|How willing to give evidence in court against the accused	
FLSIN5Y	D43|How often made an exaggerated or false insurance claim last 5 years	
BSTLN5Y	D44|How often bought something that might be stolen last 5 years	
TROFF5Y	D45|How often committed a traffic offence last 5 years	
HHMMB	F1|Number of people living regularly as member of household	
GNDR	F2|Gender	
GNDR2	F2|Gender of second person in household	
GNDR3	F2|Gender of third person in household	
GNDR4	F2|Gender of fourth person in household	
GNDR5	F2|Gender of fifth person in household	
GNDR6	F2|Gender of sixth person in household	
GNDR7	F2|Gender of seventh person in household	
GNDR8	F2|Gender of eighth person in household	
GNDR9	F2|Gender of ninth person in household	
GNDR10	F2|Gender of tenth person in household	
GNDR11	F2|Gender of eleventh person in household	
GNDR12	F2|Gender of twelfth person in household	
GNDR13	F2|Gender of thirteenth person in household	
GNDR14	F2|Gender of fourteenth person in household	
GNDR15	F2|Gender of fifteenth person in household	
GNDR16	F2|Gender of sixteenth person in household	
GNDR17	F2|Gender of seventeenth person in household	
GNDR18	F2|Gender of eighteenth person in household	
GNDR19	F2|Gender of nineteenth person in household	
GNDR20	F2|Gender of twentieth person in household	
YRBRN	F3|Year of birth	
YRBRN2	F3|Year of birth of second person in household	
YRBRN3	F3|Year of birth of third person in household	
YRBRN4	F3|Year of birth of fourth person in household	
YRBRN5	F3|Year of birth of fifth person in household	
YRBRN6	F3|Year of birth of sixth person in household	
YRBRN7	F3|Year of birth of seventh person in household	
YRBRN8	F3|Year of birth of eighth person in household	
YRBRN9	F3|Year of birth of ninth person in household	
YRBRN10	F3|Year of birth of tenth person in household	
YRBRN11	F3|Year of birth of eleventh person in household	
YRBRN12	F3|Year of birth of twelfth person in household	
YRBRN13	F2|Year of birth of thirteenth person in household	
YRBRN14	F3|Year of birth of fourteenth person in household	
YRBRN15	F3|Year of birth of fifteenth person in household	
YRBRN16	F3|Year of birth of sixteenth person in household	
YRBRN17	F3|Year of birth of seventeenth person in household	
YRBRN18	F3|Year of birth of eighteenth person in household	
YRBRN19	F3|Year of birth of nineteenth person in household	

YRBRN20	F3|Year of birth of twentieth person in household
RSHIPA2	F4|Second person in household: relationship to respondent
RSHIPA3	F4|Third person in household: relationship to respondent
RSHIPA4	F4|Fourth person in household: relationship to respondent
RSHIPA5	F4|Fifth person in household: relationship to respondent
RSHIPA6	F4|Sixth person in household: relationship to respondent
RSHIPA7	F4|Seventh person in household: relationship to respondent
RSHIPA8	F4|Eighth person in household: relationship to respondent
RSHIPA9	F4|Ninth person in household: relationship to respondent
RSHIPA10	F4|Tenth person in household: relationship to respondent
RSHIPA11	F4|Eleventh person in household: relationship to respondent
RSHIPA12	F4|Twelfth person in household: relationship to respondent
RSHIPA13	F4|Thirteenth person in household: relationship to respondent
RSHIPA14	F4|Fourteenth person in household: relationship to respondent
RSHIPA15	F4|Fifteenth person in household: relationship to respondent
RSHIPA16	F4|Sixteenth person in household: relationship to respondent
RSHIPA17	F4|Seventeenth person in household: relationship to respondent
RSHIPA18	F4|Eighteenth person in household: relationship to respondent
RSHIPA19	F4|Nineteenth person in household: relationship to respondent
RSHIPA20	F4|Twentieth person in household: relationship to respondent
ICPART1	F5|Interviewer code, lives with husband/wife/partner
RSHPSTS	F6|Relationship with husband/wife/partner currently living with
LVGPTNEA	F7|Ever lived with a partner, without being married
DVRCDEVA	F8|Ever been divorced/had civil union dissolved
ICPART2	F9|Interviewer code, lives with husband/wife/partner
ICCOHBT	F10|Interviewer code, respondent cohabiting
MARSTS	F11|Legal marital status
CHLDHM	F12|Children living at home or not at F4
CHLDHHE	F13|Ever had children living in household
FXLTPH	F13a|Fixed-line telephone in accommodation
DOMICIL	F14|Domicile, respondent's description
EDULVLA	F15|Highest level of education
EDLVDxx	F15|Highest level of education, [country]
EDUYRS	F16|Years of full-time education completed
PDWRK	F17a|Doing last 7 days: paid work
EDCTN	F17a|Doing last 7 days: education
UEMPLA	F17a|Doing last 7 days: unemployed, actively looking for job
UEMPLI	F17a|Doing last 7 days: unemployed, not actively looking for job

TESTD29	I29|Radio listening, news/politics/current affairs on average weekday
TESTD30	I30|Newspaper reading, total time on average weekday
TESTD31	I31|Newspaper reading, politics/current affairs on average weekday
TESTD32	I32|TV watching on the internet, total time on average weekday
TESTD33	I33|TV watching on the internet, politics/current affairs on average weekday
TESTD34	I34|Radio listening on the internet, total time on average weekday
TESTD35	I35|Radio listening on the internet, politics/current affairs on average weekday
TESTD36	I36|Newspaper reading on the internet, total time on average weekday
TESTD37	I37|Newspaper reading on the internet, politics/current affairs on average weekday
TESTD38	I38|Internet use other than television/radio/newspaper on average weekday
TESTD39	I39|Internet use, politics/current affairs on average weekday
REGIONxx	Region, [country]
INTAGEA	Age of interviewer
INTGNDR	Gender of interviewer
INWDDS	Start of interview, day of month
INWMMS	Start of interview, month
INWYYS	Start of interview, year
INWSHH	Start of interview, hour
INWSMM	Start of interview, minute
INWDDE	End of interview, day of month
INWMME	End of interview, month
INWYYE	End of interview, year
INWEHH	End of interview, hour
INWEMM	End of interview, minute

Capi only. See section E.3	
AINWEHH	End of module a, hour
AINWEMM	End of module a, minute
BINWEHH	End of module b, hour
BINWEMM	End of module b, minute
CINWEHH	End of module c, hour
CINWEMM	End of module c, minute
DINWEHH	End of module d, hour
DINWEMM	End of module d, minute
FINWEHH	End of module f, hour
FINWEMM	End of module f, minute

SPLTADMD	Administration of split ballot and MTMM
SUPQDD	Day of month, supplementary questionnaire
SUPQMM	Month, supplementary questionnaire
SUPQYR	Year, supplementary questionnaire

File 2: Interviewer's questionnaire

IDNO	Respondent's identification number
CNTRY	Country
RESCLQ	J1|Clarification of questions
RESRELQ	J2|Respondent reluctant to answer
RESBAB	J3|Respondent tried to answer questions to the best of ability
RESUNDQ	J4|Respondent understood the questions
PREINTF	J5|Anyone present who interfered with the interview
PREWHP	J6|Husband/wife/partner interfered with interview
PRESD	J6|Son/daughter (inc. Step/adopted) interfered with interview
PREPPIL	J6|Parent/parent in law interfered with interview
PREOREL	J6|Other relative interfered with interview

PRENREL	J6	Other non-relative interfered with interview
PREDK	J6	Don't know who interfered with interview
PRENAP	J6	Who interfered with interview not applicable
PRENA	J6	Who interfered with interview no answer
INTLNGA	J7	Interview questionnaire language
INTNUM	J8	Interviewer's identification number
ACOMINT	J9	Additional comments on the interview, interviewer
SUPQAD1	J10	Administration of supplementary questionnaire 1
SQNOTR	J11	Reason why supplementary questionnaire not self completion
SUPQRTN	J12	Supplementary questionnaire completed you present/returned later
SUPQAD2	J13	Administration of supplementary questionnaire 2
FTFNOTR	J14	Reason why supplementary questionnaire not face to face

File 3: Contact forms

IDNO	Respondent's identification number
CNTRY	Country
TYPESAMP	Type of the sample
MULTHNUM	Identification number of household on address
DEFECTCF	Contact form information for the sample unit
INTERVA	Interview information for the sample unit
TELNUM	Telephone number
INTNUM1	Interviewer-number of the interviewer who started the visits
TOTCINT1	Number of visits the original interviewer (intnum1) did
INTNUM2	Interviewer-number of the interviewer who started the re-issue
TOTCINT2	Number of visits the second interviewer (intnum2) did
INTNUM3	Interviewer-number of the third interviewer
TOTCINT3	Number of visits the third interviewer (intnum3) did
DATEV1	Date of the first visit
DATE2	Date of the second visit
DATE3	Date of the third visit
DATE4	Date of the fourth visit
DATE5	Date of the fifth visit
DATE6	Date of the sixth visit
DATE7	Date of the seventh visit
DATE8	Date of the eighth visit
DATE9	Date of the ninth visit
DATE10	Date of the tenth visit
MONV1	Month of the first visit
MONV2	Month of the second visit
MONV3	Month of the third visit
MONV4	Month of the fourth visit
MONV5	Month of the fifth visit
MONV6	Month of the sixth visit
MONV7	Month of the seventh visit
MONV8	Month of the eighth visit
MONV9	Month of the ninth visit
MONV10	Month of the tenth visit
DAYV1	Weekday of the first visit
DAYV2	Weekday of the second visit
DAYV3	Weekday of the third visit
DAYV4	Weekday of the fourth visit
DAYV5	Weekday of the fifth visit
DAYV6	Weekday of the sixth visit
DAYV7	Weekday of the seventh visit
DAYV8	Weekday of the eighth visit
DAYV9	Weekday of the ninth visit
DAYV10	Weekday of the tenth visit
HOURV1	Hour of the first visit
HOURV2	Hour of the second visit
HOURV3	Hour of the third visit
HOURV4	Hour of the fourth visit
HOURV5	Hour of the fifth visit

HOURV6	Hour of the sixth visit
HOURV7	Hour of the seventh visit
HOURV8	Hour of the eighth visit
HOURV9	Hour of the ninth visit
HOURV10	Hour of the tenth visit
MINV1	Minute of the first visit
MINV2	Minute of the second visit
MINV3	Minute of the third visit
MINV4	Minute of the fourth visit
MINV5	Minute of the fifth visit
MINV6	Minute of the sixth visit
MINV7	Minute of the seventh visit
MINV8	Minute of the eighth visit
MINV9	Minute of the ninth visit
MINV10	Minute of the tenth visit
MODEVB1	Mode of first visit
MODEVB2	Mode of the second visit
MODEVB3	Mode of the third visit
MODEVB4	Mode of the fourth visit
MODEVB5	Mode of the fifth visit
MODEVB6	Mode of the sixth visit
MODEVB7	Mode of the seventh visit
MODEVB8	Mode of the eighth visit
MODEVB9	Mode of the ninth visit
MODEVB10	Mode of the tenth visit
NUMTEL	Number of automatic calls before first face-to-face contact or contact attempts
RESULB1	Result of first visit
RESULB2	Result of second visit
RESULB3	Result of third visit
RESULB4	Result of fourth visit
RESULB5	Result of fifth visit
RESULB6	Result of sixth visit
RESULB7	Result of seventh visit
RESULB8	Result of eighth visit
RESULB9	Result of ninth visit
RESULB10	Result of tenth visit
NUMHH	Number of households at the address
HHSELECT	Number of households selected at the address
NHHMEM	Number of members 15 years or more in household
OUTNIB1	Outcome when there was no interview (visit 1)
OUTNIB2	Outcome when there was no interview (visit 2)
OUTNIB3	Outcome when there was no interview (visit 3)
OUTNIB4	Outcome when there was no interview (visit 4)
OUTNIB5	Outcome when there was no interview (visit 5)
OUTNIB6	Outcome when there was no interview (visit 6)
OUTNIB7	Outcome when there was no interview (visit 7)
OUTNIB8	Outcome when there was no interview (visit 8)
OUTNIB9	Outcome when there was no interview (visit 9)
OUTNIB10	Outcome when there was no interview (visit 10)
REFVIS1	Number of visit at which a refusal occurred (1)
REFVIS2	Number of visit at which a refusal occurred (2)
REFVIS3	Number of visit at which a refusal occurred (3)
RERSB1_1	Reason for refusal (1_1)
RERSB1_2	Reason for refusal (1_2)
RERSB1_3	Reason for refusal (1_3)
RERSB1_4	Reason for refusal (1_4)
RERSB1_5	Reason for refusal (1_5)
RERSB2_1	Reason for refusal (2_1)
RERSB2_2	Reason for refusal (2_2)
RERSB2_3	Reason for refusal (2_3)
RERSB2_4	Reason for refusal (2_4)
RERSB2_5	Reason for refusal (2_5)
RERSB3_1	Reason for refusal (3_1)

RERSB3_2   Reason for refusal (3_2)
RERSB3_3   Reason for refusal (3_3)
RERSB3_4   Reason for refusal (3_4)
RERSB3_5   Reason for refusal (3_5)
COOP1   Estimation of the cooperation rate at refvis1
COOP2   Estimation of the cooperation rate at refvis2
COOP3   Estimation of the cooperation rate at refvis3
AGEA_1   Estimation of age of respondent or household member who refuses, by interviewer
AGEA_2   Estimation of age of respondent or household member who refuses, by interviewer
AGEA_3   Estimation of age of respondent or household member who refuses, by interviewer
GENDERA1   Gender of respondent or household member who refuses, recorded by interviewer
GENDERA2   Gender of respondent or household member who refuses, recorded by interviewer
GENDERA3   Gender of respondent or household member who refuses, recorded by interviewer
OUTINVAL   Outcome address invalid
TYPE   Type of house respondent lives in
ACCESS   Entry phone or locked gate/door before reaching respondent's individual door
PHYSA   Assessment overall physical condition building/house
LITTERA   Amount of litter and rubbish in the immediate vicinity
VANDAA   Amount of vandalism and graffiti in the immediate vicinity
RECONVA   Number of visit when refusal conversion activities started

G. Programmes for applying Data Protocol variable names, labels and categories

To assist the data producers, and ensure data to be as consistent and harmonised as possible, NSD offers SPSS and SAS programmes with the official ESS variable names, labels, categories and formats. The variable labels in the programmes include the question numbers to facilitate cross-references between the questionnaires and the variables. The programmes are available for download from the "Data protocol and variable definitions" page on the ESS Archive Intranet site at http://essdata.nsd.uib.no. Please apply the Data Protocol variable names, labels and categories to the data files before you submit them to the archive. The package of programmes includes the following syntax/dictionary files:

SPSS

ESS5ms.sps	Main and supplementary questionnaires, syntax
ESS5ms.sav	Main and supplementary questionnaires, dictionary, SPSS Windows 12-14
ESS5ms.por	Main and supplementary questionnaires, dictionary, SPSS portable file
ESS5i.sps	Interviewer's questionnaire, syntax
ESS5i.sav	Interviewer's questionnaire, dictionary, SPSS Windows 12-14
ESS5i.por	Interviewer's questionnaire, dictionary, SPSS portable file
ESS5cf.sps	Contact forms, syntax
ESS5cf.sav	Contact forms, dictionary, SPSS Windows 12-14
ESS5cf.por	Contact forms, dictionary, SPSS portable file
ESS5standards.sps	Value labels for international standards in ESS (see section D1).
ESS5RenameQtoM.sps	Renaming variables in the Core, rotating modules and Interviewer's questionnaire from question numbers to ESS mnemonic names, syntax.

SAS

ESS5ms.sas	Main and supplementary questionnaires, syntax
ESS5ms.sas7bdat	Main and supplementary questionnaires, dictionary, SAS Windows 8-9
ESS5ms.exp	Main and supplementary questionnaires, dictionary, SAS portable file (proc cport)
ESS5i.sas	Interviewer's questionnaire, syntax
ESS5i.sas7bdat	Interviewer's questionnaire, dictionary, SAS Windows 8-9
ESS5i.exp	Interviewer's questionnaire, dictionary, SAS portable file (proc cport)
ESS5cf.sas	Contact forms, syntax
ESS5cf.sas7bdat	Contact forms, SAS Windows 8-9
ESS5cf.exp	Contact forms, SAS portable file (proc cport)
ESS5formats1_2.sas	Definition of formats, all data files
ESS5standards.sas	Formats for international standards in ESS (see section D1).
ESS5RenameQtoM.sas	Renaming variables in the Core, rotating modules and Interviewer's questionnaire from question numbers to ESS mnemonic names, syntax.

Comment to ESS5standards.*: If the survey organisation does not have procedures for automatic checking of wild codes in the variables
CTZSHIPB "Citizenship"
CNTBRTHB "Country of birth"
LNGHOM1 "language most often spoken at home: First mentioned"
LNGHOM2 "language most often spoken at home: Second mentioned"
FBRNCNTA "COUNTRY OF BIRTH, FATHER"
MBRNCNTA "COUNTRY OF BIRTH, MOTHER"
ISCOCO "OCCUPATION, ISCO88 (COM)"
NACER2 "INDUSTRY, NACE rev.2"
ISCOCOP "OCCUPATION partner , ISCO88 (com)"
the value labels/formats in ESS5standards.* can be added to File 1 to facilitate proof-reading (spotting empty labels in frequency tables).

H. National technical summary

The meta data documentation is an important part of the high quality ESS data and represents one of the major strengths of the European Social Survey. The National Teams have a central role in the production of such documentation by providing the National Technical Summary (NTS).

For those who have access to the fully licensed Adobe Acrobat program, NSD will make an electronic National Technical Summary Form in PDF format, for the teams to download, fill in and deposit to the ESS Archive at NSD along with the other electronic deliverables. The form will be available for download from the "Survey documentation" page at the ESS Archive Intranet site http://essdata.nsd.uib.no/ in October 2010. The National Teams will be notified by e-mail when the form is available.

NSD encourages the use of the PDF electronic form. For users who do not have access to a fully licensed Adobe Acrobat, a version will also be available in Word format.

Please save the National Technical Summary file as Ntech2010xx, where xx is the country code as specified in table E1.
